

## Cormant Data Center World Tour 2018

### Cormant to attend Data Center World Events in both USA and UK in support of latest Cormant-CS 9.3 Release

**San Luis Obispo, California, USA, March 12<sup>th</sup>, 2018** – Cormant Inc., a pure-play developer of complete, easy-to-use data center infrastructure management (DCIM) software, is reminding all Data Center professionals considering DCIM to come and see Cormant’s latest version of its leading DCIM Solution. Cormant will be at the following Data Center World events.

**March 14<sup>th</sup> / 15<sup>th</sup> Data Center World, America – San Antonio – Booth 126**  
**March 21<sup>st</sup> / 22<sup>nd</sup> Data Center World, Europe – London – Booth D1435**

Cormant-CS is a complete DCIM solution that delivers unmatched functionality, full online and offline mobility, network discovery, intuitive ease of use, and rapid return on investment. At Cormant we don’t think about enterprise DCIM success as just software. To ensure DCIM delivers a real ROI, Cormant delivers consulting, training, best practice advice and implementation services to guarantee DCIM success.

Our latest 9.3 release brings further advances in the Cormant-CS web platform, including cross platform support for PC, Tablet and Phones, with unique barcode scanning functionality to instantly identify equipment in the data center.

Our full solution is designed to encompass all of your DCIM management needs in one platform. We will consult with you on a set of best practices as well as showcase our powerful features to include the following in the Cormant-CS software package:

**Asset Management:** To maximize the value of your assets over time, dock to decommission.

**Cable Management:** To record your entire physical infrastructure with visual dashboard and historical trends.

**Capacity Optimization:** To use asset and queried data to deliver analysis on optimizing all aspects of the data center and infrastructure.

**Full Mobility** To maximize data accuracy, supporting both online and offline workflows through change execution, auditing and problem solving.
