

Cormant-CS Infrastructure Monitoring, Integrations, Partners and Open API

Cormant knows that a Cormant-CS DCIM solution is unlikely to stand-alone. Cormant provides multiple methods to support integration from a simple script or scheduled export, through pre-tested plug-in integration modules to partnerships with third party vendors of equipment and software.

Cormant consultants and certified partners can assist with every aspect of extending a Cormant-CS solution to be an integral part of the enterprise datacenter and IT tool set.

Infrastructure Monitoring

Cormant-CS comes with a built-in scripting engine that is fully integrated with Cormant-CS SNMP and XML libraries. Cormant maintains a library of popular query scripts that are ready to go out-of-the-box. Customers can write additional scripts.

Current scripts exist for multiple brands of: Smart PDUs, wireless sensors, rack security monitoring systems, VM monitoring, terminal server, BMS switches and servers.

The built in scripting engine provides great flexibility when gathering external data or developing a custom metric to measure the data center efficiency, scripts also exist for internal data aggregation, including power, thermal, PUE, DCSE and other efficiency metrics, all customizable.

Partners

Cormant partners with select technology vendors where we believe the partner shares our vision of cost effective, state of the art data center management. Partners include:

- TSO Logic
- Server Technologies
- Corning
- Emerson Therm-O-Disc

Open API

Cormant-CS comes with a fully documented, two-way open web services API. Allowing customers to build interfaces between in-house systems and any Cormant-CS data.

Integrations

The Cormant-EDIS – External Data Integration Services - is available as an extension to the Cormant-CS DCIM solution and provides a plug-in framework for complex one or two way interfaces. A key benefit of this frame-work is a lower cost of interface delivery, increasing the ROI of Cormant-CS DCIM

The benefits of a plug-in framework are faster deployment of new interfaces, a common management platform for monitoring and control and fewer systems to manage.

A sample list of interfaces includes:

ITSM / CMDB

- ServiceNOW
- Remedy
- Salesforce.com

BMS

- Niagara/JACE
- IBMS

Financial System

- SAP
- Xero

Environmental

- Server Technologies SPM
- Emerson Therm-O-Disc
- RF Code
- Raritan Power IQ

WITH CORMANT, BUSINESS IS PERSONAL

Cormant-CS Data Center Infrastructure Management (DCIM) Cormant Support and Services

Consultation

You're ready for success with Cormant-CS or are ready for even more. We can help you set new goals and structure a plan to accomplish those goals.

Implementation

Expand your use of Cormant-CS to other sites or new functionality. Cormant can help you create a plan around your goals, train your team, and roll out the software and processes. Cormant consultants can also help set-up or configure templates, attributes, reports, and more.

Integration

With our advanced API, we've integrated with many of the leading solutions in the data center. Ask us about our plug-and-play integrations to save you time and money, such as with ServiceNow, Remedy, Niagara, RF Code, and more.

Site Audits

The true power of Cormant-CS stems from a foundation of accurate data. Cormant staff can update your current data imports with a full site audit providing an accurate inventory of all your layer 1 assets.

Training

We have training courses available to enhance your Cormant-CS knowledge. Courses include implementation, configuration, API, Workflow Design, System Administration, and more. We can get you on the right track to success to get the most out of Cormant-CS.

Did you know?

Our annual support agreement provides access to all new releases and our world-class, in-house, 24-hour support team.

Did you know?

Cormant offers barcode labels to save time when accessing equipment in the field with your mobile device. We offer optional services to label your entire infrastructure for you.

Did you know?

Cormant-CS can manage all the equipment and connectivity in MDF/IDF/Telecom rooms and small, remote computer rooms in addition to data centers.

Did you know?

Cormant-CS can manage your equipment in co-location sites, not just the equipment in owned data centers.
