Cormant-CS Data Center Infrastructure Management (DCIM)

DYNAMIC VISIBILITY

Rack views, plan views and full channel connections including capacity, trend, efficiency, power and environmental data. Keeps data accurate and scales to tens of thousands of racks, as needed.

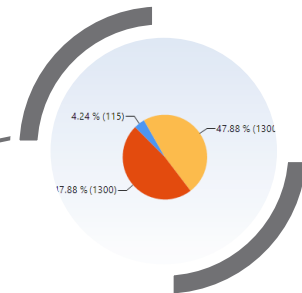

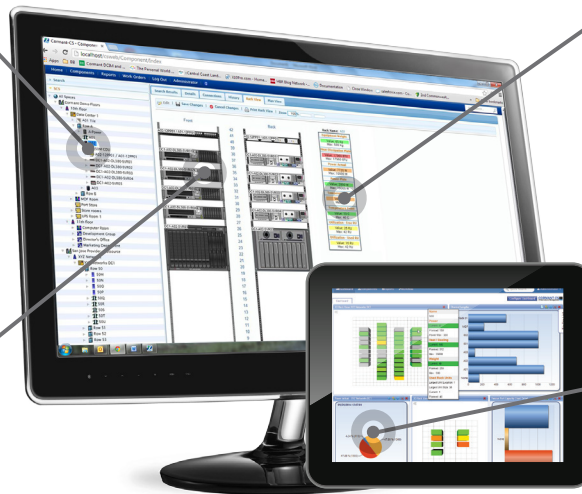

ACTIONABLE MONITORING

Monitor and optimize power, cooling, data connectivity and overall device resources. Manage alerts from the dashboard with a consolidated view of your top priorities.

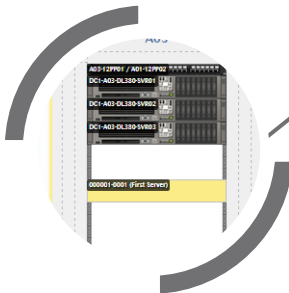

STREAMLINED PROCESSES

Powerful Workflow enables collaboration and communication of resources and teams for processes including device changes, deployments and more. Workflow helps plan future changes by identifying optimal locations and reserving space.

IMPACTFUL ANALYTICS

Measure, manage and share data with intelligent and configurable alerts, charts and tables for informed decision-making.

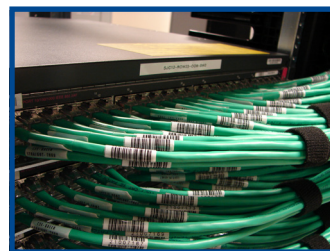

The Cormant-CS Difference

MOBILITY

Efficiently record changes at the site of the change for continued data accuracy from day 1 to day 1,000 and beyond including online and offline functionality.

CONNECTIVITY

Quickly and easily document end-to-end power and data connections and port availability in data centers and campuses.

TRUSTED EXPERTISE

You'll gain a trusted business partner with over ten years of experience, hundreds of successful implementations and hundreds of loyal customers.

PERSONAL SUPPORT

World class, 24-hour, in-house support team with prompt and thorough assistance and follow up to ensure satisfaction wherever you are in the world.

EASE-OF-USE

A simple UI and a six-step implementation approach remove complexities for an easy-to-use and easy-to-learn experience.

CONFIGURABILITY

Open framework to configure and extend functionality as needed. Includes an open API, scripting and configurable attributes, templates and analytics.
