

WHY AREN'T YOU USING DCIM?

Other DCIM Tools

Cormant DCIM

TOO EXPENSIVE

Cost-effective pricing for a fast ROI. We've seen a customer save \$6 million in one year.

Most customers reach positive ROI within **1 YR.**

TOO COMPLEX

Easy-to-use software with a simple UI, seamless functionality

94%

Customers retention rate

TOO TIME CONSUMING

On average, we deploy a 250 rack facility in 30 person-days.

92%

Percentage of time Customers say they saved

HARD TO KEEP UP TO DATE

Online and Offline mobility delivers access to all DCIM data everywhere

Record changes as they occur

TOO MANY FEATURES TO LICENSE

Simple, flat licensing model scaled to what you need with no users seats to buy.

No Modules to buy
Unlimited concurrent users

SYSTEMS WON'T INTEGRATE SEAMLESSLY

Fully configurable. We can interface with any of your existing systems.

Open API can integrate with any 3rd party system

"The system's ease of use and mobility meant we knew we could roll this out to our teams and they would use it. This has proved to be the case and multiple teams now 'self-serve' using the Cormant-CS web."

Mike Alexander, Implementation Manager in Data Center Facility Engineering at McKesson, 2014.

Easy to Use

Cormant-CS delivers a powerful, complete DCIM solution across web and mobile platforms using a simple, intuitive user-interface, built around tabs and a familiar tree approach.

Closed Loop Change Process

With use of Cormant-CS on web, online and offline mobile phones and tablets and the Cormant integrated Workflow system. Planning, executing and visualizing changes as they happen in 'real-time', by recording change on a mobile device as the change is made.

Improve Decision Making

With multiple graphical views of the data from racks and plan views, to historical trend and capacity dashboard, Cormant-CS provides full infrastructure visibility. When planning further change trusted data is used to suggest optimal asset placement.

Optimize the Data Center

Cormant-CS includes an open script engine to collect data from almost any device. Combined with automatically aggregated capacity data, reporting, alerting and trending, Cormant-CS can ensure the data center is optimally used.

THE CORMANT DIFFERENCE

Fully Configurable

Cormant-CS provides an open framework to define exactly the equipment, infrastructure and attributes each organization requires. Analytics and data collection are also configurable to precise customer needs.

Connectivity

Full connectivity management of all data and power channels, includes capacity and redundancy analysis to ensure maximum uptime and risk mitigation.

Monitoring and Alerting

Cormant-CS collects and monitors data from any networked device. The data is used for problem alerting, trending, capacity management and change planning.

Trusted Expertise

Cormant has been deploying DCIM solutions since 2003. Cormant has customers on five continents from 35 racks to over 25,000 in a single instance of Cormant-CS

Full Implementation

Cormant provides a full suite of implementation services to ensure customer success. Cormant is able to offer services from just training to full turn-key, including price guarantees.

Personal support

Cormant staff work with each customer from pre-sales through implementation. Cormant employs an in-house 24-hour support desk of dedicated Cormant experts.
