

CORMANT DCIM FROM BGIS

BGIS offers best in class Data Center Infrastructure Management software with Cormant-CS. Cormant-CS was the world's first DCIM with a track records of success since 2004.

CORMANT-CS

- Mature solution, with continuous customer use for over 18 years, hundreds of successful customer deployments globally.
- Software only solution, no hardware to buy, straight forward implementation, fully supported with BGIS professional services.
- Simple licensing model, supporting small entry points, to full enterprise customers. Unlimited users, data points and monitoring.
- Globally scalable to over 100,000 racks.

Success with Cormant DCIM

Cormant-CS DCIM eliminates siloed data sources such as multiple spreadsheets, databases and drawings, delivering a single source of truth to manage Data Center Infrastructure assets and capacities.

- Instantly track and locate any device, card, power or data connection.
- View full history of the data center and capacities.
- Find and remove underutilized equipment, maximize rack capacities. Save money and meet corporate environmental goals with power and CO₂ reduction.
- Visualize spaces, floorplans and rack elevations in 3D.
- Mobile data access to update and audit the infrastructure, ensures data is always accurate and meets compliance.
- Resolve issues faster, and first time.
- Collaborate with team members across the data center or across the world with a, secure, real-time view of capacities and plans.

“Cormant DCIM has delivered more than we expected to the US Senate and we keep finding new ways to improve the operation of the data centers we run.”

Joe LaPalme, Manager, Enterprise IT Operations, U.S. Senate

“Cormant DCIM’s ease of use and mobility meant we knew we could roll this out to our teams and they would use it, multiple teams now ‘self-serve’ using Cormant-CS”

Mike Alexander, Implementation Manager, Data Center Facility at McKesson.

“Cormant DCIM is simple enough to use that I can teach my kids to use [it] at home.”
